Hello, I often walk with my family up the hill and have been pleasantly surprised at how well this house has turned out. The natural materials blend in with the beauty of nature, and I'm impressed by the large windows.

This appears to be such a high quality construction and the design so well thought out, I'm always excited to see if when we walk that way.

I don't understand the details of the permit; I do hope this house is allowed to exist as it stands. It is a welcome addition to the neighborhood!

Cheers, Allan.
